

**Mark FLOWERS**

---

My principal place of residence is in the Tairua-Pauanui Community Board area.

I've lived in Hawke's Bay and Hamilton, and owned a property in Tairua for nearly 20 years. A couple of years ago my wife and I decided to live

in Tairua – a very rewarding change!

I have substantial experience in running hospital and community health services; tertiary education; and international education services. Both in cities and communities in the wider regions.

This has frequently involved careful community consultation about very controversial and difficult plans for services and building facilities. This has given me considerable insight into the planning, management and operation of local and national organisations.

I believe there is a great potential for community input into improving prosperity and services in Tairua and Pauanui, and the wider Coromandel, while paying close attention to cultural and environmental issues.

It would be a great honour to help represent the views of our communities and contribute to the TCDC planning processes.

**Cath WIGHTMAN**

---

My principal place of residence is in the Tairua-Pauanui Community Board area.

I love living, playing, and working on the Paradise Coast.

Having holidayed in Tairua as a child, I became a permanent resident in 2001 and raised my three children here.

I am passionate about ensuring the needs of our community are met. We will see continued growth; families through to retirees will make our area their home and holiday destination. We need to cater to all and involve the community in our decision-making. As a mum, I know the benefits of an active life and will make decisions that support wellness in our community.

I am a businesswoman skilled in operations and property management, hospitality, and tourism, positioning me to deliver in this role.

I am a strong relationship builder and team player, hardworking, and committed to ensuring positive outcomes for our community. As your representative, I will be your voice across our community assets and maintain our unique environment.
